PATENT COOPERATION TREATY

PCT

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference IGT1P305.WO	FOR FURTHER ACTION	See item 4 below	
International application No. PCT/US2004/030198	International filing date (day/month/year) 15 September 2004 (15.09.2004)	Priority date (day/month/year) 15 September 2003 (15.09.2003)	
International Patent Classification (8th edition unless older edition indicated) See relevant information in Form PCT/ISA/237			
Applicant ACRES GAMING INCORPORATED			

1.	This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 <i>bis</i> .1(a).				
2.	This REPORT consists of a total	of 8 sheets, including this cover sheet.			
		ence to the written opinion of the International Searching Authority should be read as a reference report on patentability (Chapter I) instead.			
3.	This report contains indications relating to the following items:				
	Box No. I	Basis of the report			
	Box No. II	Priority			
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability			
	Box No. IV	Lack of unity of invention			
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement			
	Box No. VI	Certain documents cited			
	Box No. VII	Certain defects in the international application			
	Box No. VIII	Certain observations on the international application			
4.		ommunicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but makes an express request under Article 23(2), before the expiration of 30 months from the priority			

	Date of issuance of this report 16 March 2006 (16.03.2006)
The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland	Authorized officer Philippe Becamel

1.	This opinion	contains	indications	relating to	the	following	items:
----	--------------	----------	-------------	-------------	-----	-----------	--------

\boxtimes	Box No. I	Basis of the opinion
	Box No. II	Priority Visit and inchilled the second of t
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
	Box No. IV	Lack of unity of invention
\boxtimes	Box No. V	Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	Box No. VI	Certain documents cited
\boxtimes	Box No. VII	Certain defects in the international application
\boxtimes	Box No. VIII	Certain observations on the international application

FURTHER ACTION 2.

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notifed the International Bureau under Rule 66.1 bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

For further details, see notes to Form PCT/ISA/220. 3.

The following defects in the form or contents of the international application have been noted:

see separate sheet

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

Re Item V.

1. Reference is made to the following documents:

D1: US 5 816 918 A (KELLY ET AL) 6 October 1998 (1998-10-06)

D2: US 6 319 125 B1 (ACRES JOHN) 20 November 2001 (2001-11-20)

2. The subject-matter of **claim 1** does not comply with the dispositions set out in Articles 33 (1) and (3) PCT regarding inventive step.

Document D1 discloses according to most of the features of claim 1, a gaming network (figure 3, 4), comprising:

- a gaming device (figure 3, 4) coupled to the network;
- a host system (figure 3) structured to communicate (column 21, line 31 34) with the gaming device and structured to store historical information about a player (column 21, line 28 - 30);
- a game state database (column 21, line 28 30) coupled to the host system (column 21, line 31 34, figure 3) and structured to store a state of a game of the player (column 21, line 31 35) after the player is no longer playing the game;
- a packet generator structured to generate a message paket that includes a unique player identifier of the player and to send (column 21, line 28- 33) it to the host system; and
- a paket receiver structured to receive the message paket and perform a function (column 21, line 33 42).

The subject-matter of claim 1 differs from the disclosure of document D1 in that, the paket receiver decodes the player identifier to perform a function based on the identity of the player.

The technical problem to be solved by the present application can therefore be regarded as how to ensure that a game device loads the corresponding state of a game of a player.

A skilled person in the field networked (gambling) gaming devices starting from the

disclosure in D1 on column 21, lines 28 - 30 where it is already explicitly mentioned that a credit account (state of the game) is linked and stored together with a player ID) and further aware of the teaching of D1 on column 21, line 33 - 42) that the credit account of a player can be sent to any networked gaming device has to decode the player id of a player who wants to play on a networked gaming device as a necessary implementation detail in order that the server can send the right credit account of this player to the gaming device. Therefore a skilled person would arrive without any inventive ability at a system corresponding to the subject-matter of claim 1.

The subject-matter of claim 1 is thus considered to be not inventive (Articles 33(1) and (3) PCT).

- With respect to the objection raised above, the subject-matter of independent claim
 6 does also not comply with the dispositions set out in Articles 33 (1) and (3) PCT.
- 3.1 The subject-matter of **independent method claim 6** corresponds to the subject-matter of system claim 1, whereby all the method steps of the method claim are represented by corresponding structural system features. The objections raised in respect of the system claim, therefore, also apply, mutatis mutandis, to this claim.
- 4. The subject-matter of **method claim 9** that is formulated as independent claim does not comply with the dispositions set out in Articles 33 (1) and (2) PCT regarding novelty (see column 28, paragraph 1).

Remark: As D1 already discloses most of the features of independent method claim 6 and all the features of independent method claim 9, the applicant should, in order to avoid a possible non-unity objection, integrate the claims 9 to 11 as dependent claims to claim 6.

- For the sake of completeness, it is pointed out that the subject-matter of claims 1, 6
 and 9 is also not inventive, respective new, over the disclosure of document D2 (see
 citations in the search report).
- 6. Dependent claims 2 5, 7, 8, 10 and 11 do not appear to contain any additional

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

PCT/US2004/030198

features which, in combination with the features of any claim to which they refer, involve an inventive step for the following reasons: the subject-matter of said claims is either directly derivable from prior art documents or represent minor details generally known in the field.

Therefore the subject-matter of these dependent claims does not involve an inventive step so that these claims do not comply with the dispositions set out in Articles 33 (1) and (3) PCT.

Re Item VII

Certain defects in the international application

- 1. The independent claims are not in the **two-part form** required by Rule 6.3(b) PCT, with a preamble based on D1.
- The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).
- 3. Contrary to the requirements of Rule 5.1 (a)(ii) PCT, the relevant **background art** disclosed in document D1 is not discussed in the description, nor is this document identified therein.

Re Item VIII

Certain observations on the international application

The wording of a claim should leave no doubt as to which category the claim belongs.
 In order to meet the requirements of Art. 6 PCT with respect to clarity, the system claim 4 should be defined in terms of structural apparatus features and not in terms of a method ("a process...").

The claim should refer clearly to a single category. An amendment could be worded e.g. "... a mechanical card reader with a processor that is coupled to the mechanical card reader, the processor adapted to send a card data message...".

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/US2004/030198

2. There is no antecedent definition for the term "the visual indication..." in claim 10 which renders this claim unclear.
